# Rivdom ONE<sup>1</sup>

THE CORDLESS BATTERY RIVETER

### Get to know Rivdom and get excited!

Blind rivets up to 5 mm diameter of all materials are set reliable with the powerful motor and the optimal coordination.

The modern Li-Ion batteries are of a great capacity and quickly ready for use after being charged with the supplied quick charger.

Useful details as the transparent collecting container

(which enables the filling level of the torn-off mandrels to be visible at all times) or a LED lamp that lights the riveting point, completes the strong appearance.

Many satisfied customers are already convinced of the outstanding price/performance ratio.

Now available in different equipped versions.

- » Working range:  
Blind rivets up to diameter 5,0 mm all materials
- » Stroke: 21 mm **NOW EVEN STRONGER!**
- » Working power: 10.000 N
- » Max.diameter of mandrel: 3,4 mm
- » Charging time (1,5 Ah battery): < 1 hour
- » Weight: 1,8 kg (with 1,5 Ah battery)

Sturdy plastic case with metal locks and space for two batteries.

Optical capacity indicator on each battery

LED lighted drill hole

For blind rivets up to 5,0 mm diameter

All standard nose pieces included in separate box

Transparent mandrel collector

Brilliant ergonomics, balance and low weight

OPTIONAL

- Extended front sleeve
- Extended nose piece
- Facade nose pieces
- Special nose pieces
- Quick change nose piece

OPTIONAL

Retention nose piece avoids losing of the rivet in an upright working position

LED illuminated working area

Gummed grip

Premium quick-charger

OPTIONAL

Car charger 12V/24V

Sturdy plastic case with metal locks

Big, safe base

Powerful Li-Ion batteries with comfort capacity indicator  
(14,4 V/1,5 Ah or 14,4V/3,0 Ah) -depending on version-

Attractive sales packaging

## A new constant in independent blind rivet handling
