

Sturdy handriveting tools

Battery-powered riveting tools of the latest generation

Advanced and reliable pneumatic riveting tools

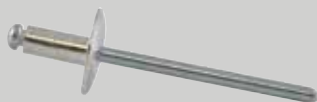

Individually constructed process

Details on pages 230/231

Who can do what? The “Who-is-Who” of serial tools. Do you only want to use blind rivets?

BZ

Blind Rivets

BZ tools are all about the working of the classical blind rivet in all its varieties. The BZ series is available as hand, lever or lazy tong pliers, as well as pneumatic-hydraulic operated tools.

VNG

Blind Rivet Nuts and Blind Rivet Bolts

VNG tools can set blind rivet nuts as well as RIFBOLT blind rivet threaded bolts. They are available as hand or lever pliers, as well as pneumatic-hydraulic operated tools.

Do you need the freedom of cordless riveting? Or shall your hand riveting tools be able to set all types of blind rivets?

Multi Rivdom

Blind Rivets, Blind Rivet Nuts and Blind Rivet Bolts

The MULTIS can do anything. All three blind rivet products are workable with only one tool!
Multi-functional tools are exclusively available as hand or lever pliers in our program.

Battery-powered Riveters for comfortable cordless freedom

Rivdom is modern. Rivdom is cordless. Rivdom stands for our product line of battery-powered riveters.

All from one source

DEVELOPMENT.CONSTRUCTION.PRODUCTION.MAINTENANCE.SERVICE.REPAIR.

The perfect processing of our blind rivet products is one of our core competences **for decades**. For us this includes various aspects which we have concentrated in two divisions of our **competence center riveting** at our location in Neumuenster.

The first division attends day by day to **developing** new ideas. Creative, with great know-how, leaving well-known paths and at the same time taking into account the feedback of our customers as well as technical sales and our service team.

Checking feasibility is followed by the conversion through **experienced engineers** working at modern CAD-work stations, the building of prototypes and in-house endurance tests on several machines with various surrounding conditions. This ends in mounting or **production** and their permanent control and optimization. Current example is the successful **Rivdom® battery-riveter** with its extended corresponding accessory options.

The second division is our new **service work shop**, in which our well-trained personnel attend to **fast repair of all tools** - from hand rivet tools via battery-powered riveters to pneumatic tools - no matter if they are **from our own assortment or from other manufacturers**.

Our excellently equipped and modern work stations and an extremely high stock of thousands of spare parts enable our repair professionals to deal with any complicated case to avoid any downtime in your work flow. If needed we can provide a sufficient number of **rental tools**.

Also a **preventive service** is increasingly important. Please check with our sales staff concerning the possibilities of enhanced warranty, maintenance plans and service packages.

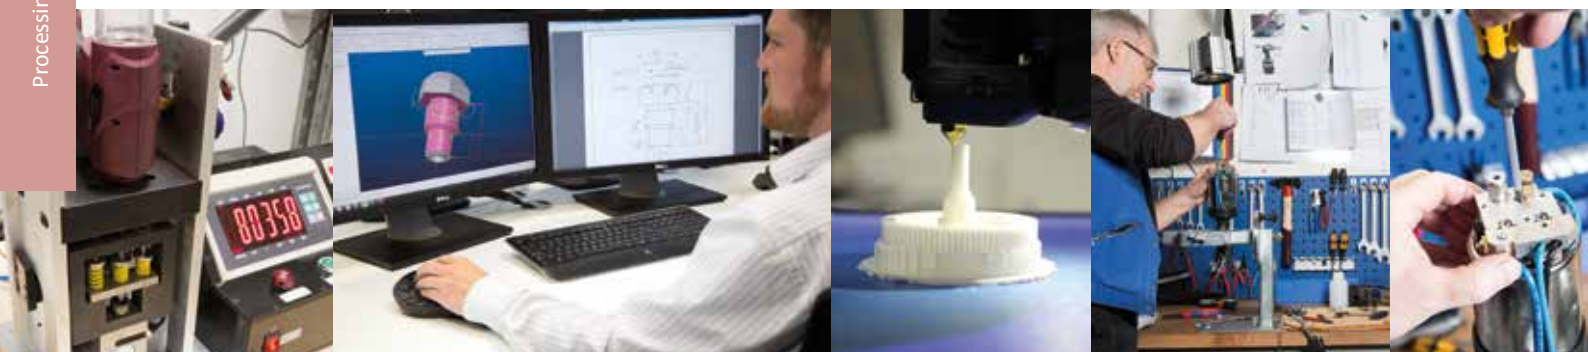

ONLINE-CHECK-IN

Take advantage of our **ONLINE-CHECK-IN SERVICE** for repairs and maintenance on our website.

Reliable and durable.

Many of our pneumatic tools, like the BZ tool from the 1960s, has been performing successfully in daily operation until now.

Specific. Individual. YOU.

Use our quality tools completely designed in your company's corporate design. **Inspire your customers with your "own" tool** and increase the loyalty to your trademark and your sales volume.

You receive a **tool in your requested colour**, with **your company logo, your individual labels**, manual and design of the packaging.

We support you professionally. **Experienced project planning, design based on your guidelines**, samples, long-term delivery schedules and - on request - the maintenance and repair service makes the realization as easy as possible for you.

Contact us - we will inform you about minimum order quantities and basic conditions and design **your rivet tool** with you!
